WOODNATION TIMBER SHUTTERS

WoodNation supplies and installs high quality timber shutters in either Western Red Cedar or Basswood. Both are environmentally responsibly plantation grown timbers. WoodNation only uses high quality furniture graded timbers originally of North American or Chinese origin. Western Red Cedar timber is softwood highly regarded for its strength and warp resistance while Basswood is a hardwood timber well known for its pale toning and not so prominent grain which is well suited for painting and staining.

WoodNation Timber Shutters can be installed as fixed, bi-fold, sliding or hinged to the relevant position. Your options are many, to suit your style of opening. We will be happy to advise you on your best option. Control Bars can be front central or concealed. We can even devise shutters for archways and curved windows if required.

Blade sizes available for WoodNation Timber Shutters are 63mm/89mm and 114mm for Basswood with Western Red Cedar available in 89mm. Normally the choice is larger blades for larger openings. Styles available are Plantation (with centre tilt rod) and Clearview (no visible rod).

WoodNation shutters are backed with a comprehensive 5 year warranty on the shutters including paintwork and a 12 month warranty on installation. Please see our warranty conditions for further details.

WoodNation shutters are easy to clean and care for and are highly flexible in use. WoodNation Plantation shutters not only enhance your home but can also add significant value to your home making them a fantastic investment.
